## SUMMARY

---

Electronics and Communication Engineering student with strong Python programming skills and experience in data analysis, machine learning, and web development. Skilled in creating scalable solutions to solve real-world challenges.

## EDUCATION

---

**SRM Institute of Science and Technology**, Chennai, India

BTech in Electronics and Communication Engineering

2021 - 2025

GPA: 7.84

## SKILLS

---

**Languages:** Python, HTML, CSS, JavaScript

**Tools:** TensorFlow, PyTorch, NumPy, Pandas, Scikit-learn, Seaborn, Tableau, Git

**Cloud:** Google Cloud Platform, Firebase

**Other:** Data Visualization, Statistical Analysis, Data Cleaning

## EXPERIENCE

---

**Lead Intern, Frontend**

Mar 2022 - May 2022

*Eucto Digital, Chennai, India*

- Designed and implemented UI components for healthcare applications, increasing user engagement.
- Supervised a team of 10+ freshers, ensuring adherence to design standards.

**Web Development Head**

2021 - 2023

*Optizen*

- Developed dynamic web applications using JavaScript, CSS, and Figma prototypes.
- Enhanced online visibility with scalable, interactive web solutions.

## PROJECTS

---

**IPL EDA (Exploratory Data Analysis)**

- Analyzed IPL datasets using Python to uncover insights and patterns.
- Used Pandas, Matplotlib, and Seaborn for data visualization.

[Project Link](#)

**YouTube Skeleton Clone**

- Built a serverless video processing system using GCP and Firebase.
- Features: video hosting (GCS), transcoding (FFmpeg), scalable workloads (Cloud Run), and secure user authentication (Firebase Auth).

## CERTIFICATIONS

---

- Python for Data Science and Machine Learning (Udemy)
- Data Structures and Algorithms in Python Bootcamp (Udemy)
